

SQUEEZE FLASHLIGHT - GYRO

The Gyro Squeeze Flashlight is bright and can be quickly recharged on the go with one hand. Gyro rechargeable flashlights are great for lighting dark hallways during power outages or walking remote hiking trails after dusk. The translucent housing also allows those interested in science and engineering to marvel at the miniature dynamo crank generator and gear system.

Key Features:

- Tripple StarCore LED array produces bright and uniform flood light beam
- Can be recharged with one hand
- 1 minute of charging provides 5 minutes of light
- Retractable and locking squeeze lever
- Durable construction
